Seed at 2x Speed | Easy to Operate | Improved Crop Yields

A New Era For Microgreens

Nearly every microgreens farm around the globe still seeds by hand—a process that's both time consuming and labor intensive. But that's about to change!

Introducing The Little Green Seeding Machine, designed to tackle this significant challenge by cutting seeding time in **HALF!** With this innovative machine, you can effortlessly **seed up to 300 trays per hour with accuracy**, regardless of the microgreen variety.

Before

Slowly measuring out seed by hand

Uneven growth

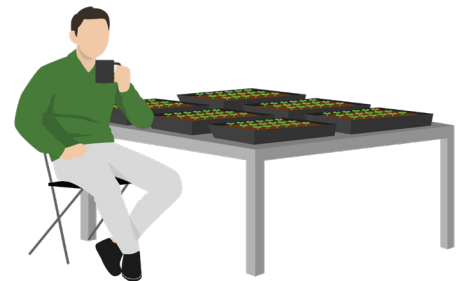

Clumpy seeding causing disease

Back aches from seeding

After

Quickly seed 300 trays per hour

Even and uniform growth

No clumping means perfect seed uniformity

Easy to use; no sore back or knees

Perfect for any size farm

Built By Farmers, For Farmers

Microgreens Consulting and VertiGrow have joined forces to develop tools that **save microgreens farmers time**, enhance product quality, and reducing plant disease.

The Little Green Seeding Machine is a product of this collaboration, designed, created, and manufactured **by farmers for farmers**.

Every aspect of its design was meticulously considered with the microgreens farmer in mind. From its **ergonomic design** to its **quick seed-changing capability**, the Little Green Seeding Machine makes microgreens seeding a breeze!

How to Use

The Little Green Seeding Machine

Step 1

Insert roller matching the desired seed variety

Step 2

Insert wheels matching the seeding rate you want

Step 3

Adjust front wheels to match the back wheels and adjust brush tension

Step 4

Add your seed

Step 5

Take the afternoon off with all your new free time

FarmWare^{PRO}

Full Time Farm Manager

The VertiGrow team has been working hard in collaboration with small and large farms around the world to bring you **FarmWare**, an end-to-end farm management system designed to simplify everything from seeding to shipping. Manage everything from your crop recipes and growing schedules, to packing and delivery of your orders with just a few clicks!

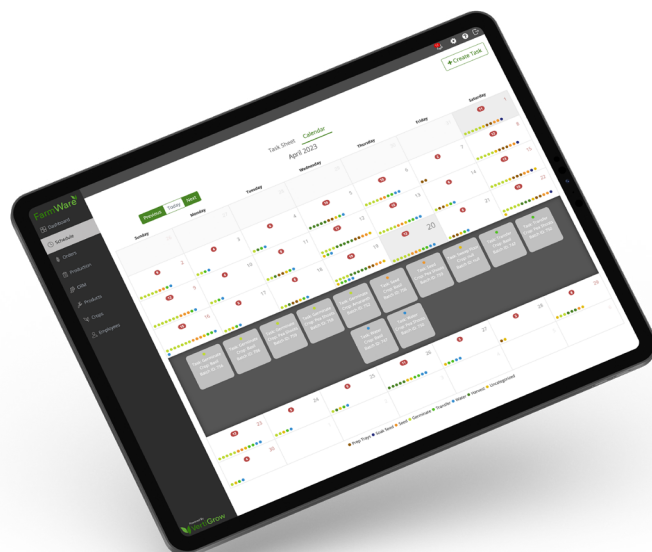

Simplify the day-to-day

FarmWare simplifies all your crop recipes and production needs into a daily task sheet so anyone can show up at the farm and know exactly what needs to be done to keep things running smoothly. **FarmWare** ensures you always have enough for your orders, and everything is ready on time, every time.

Improved Traceability

Every batch of crop you grow with **FarmWare** Pro gets a unique traceable Batch ID linked to seed lot numbers, employee tasks, and orders, for a full traceability pipeline. With one click you can see everything that happened to a batch of crop from seed to delivery, making audits and recalls quick and easy.

Seed Faster, Grow Smarter
